The Problem

A customer walks into the store with a simple question...

Headquarters Sees the Pain

Support tickets are piling up, stores need customer visibility

Enter the AI Agent

A Copilot Studio agent is created, the store's new concierge

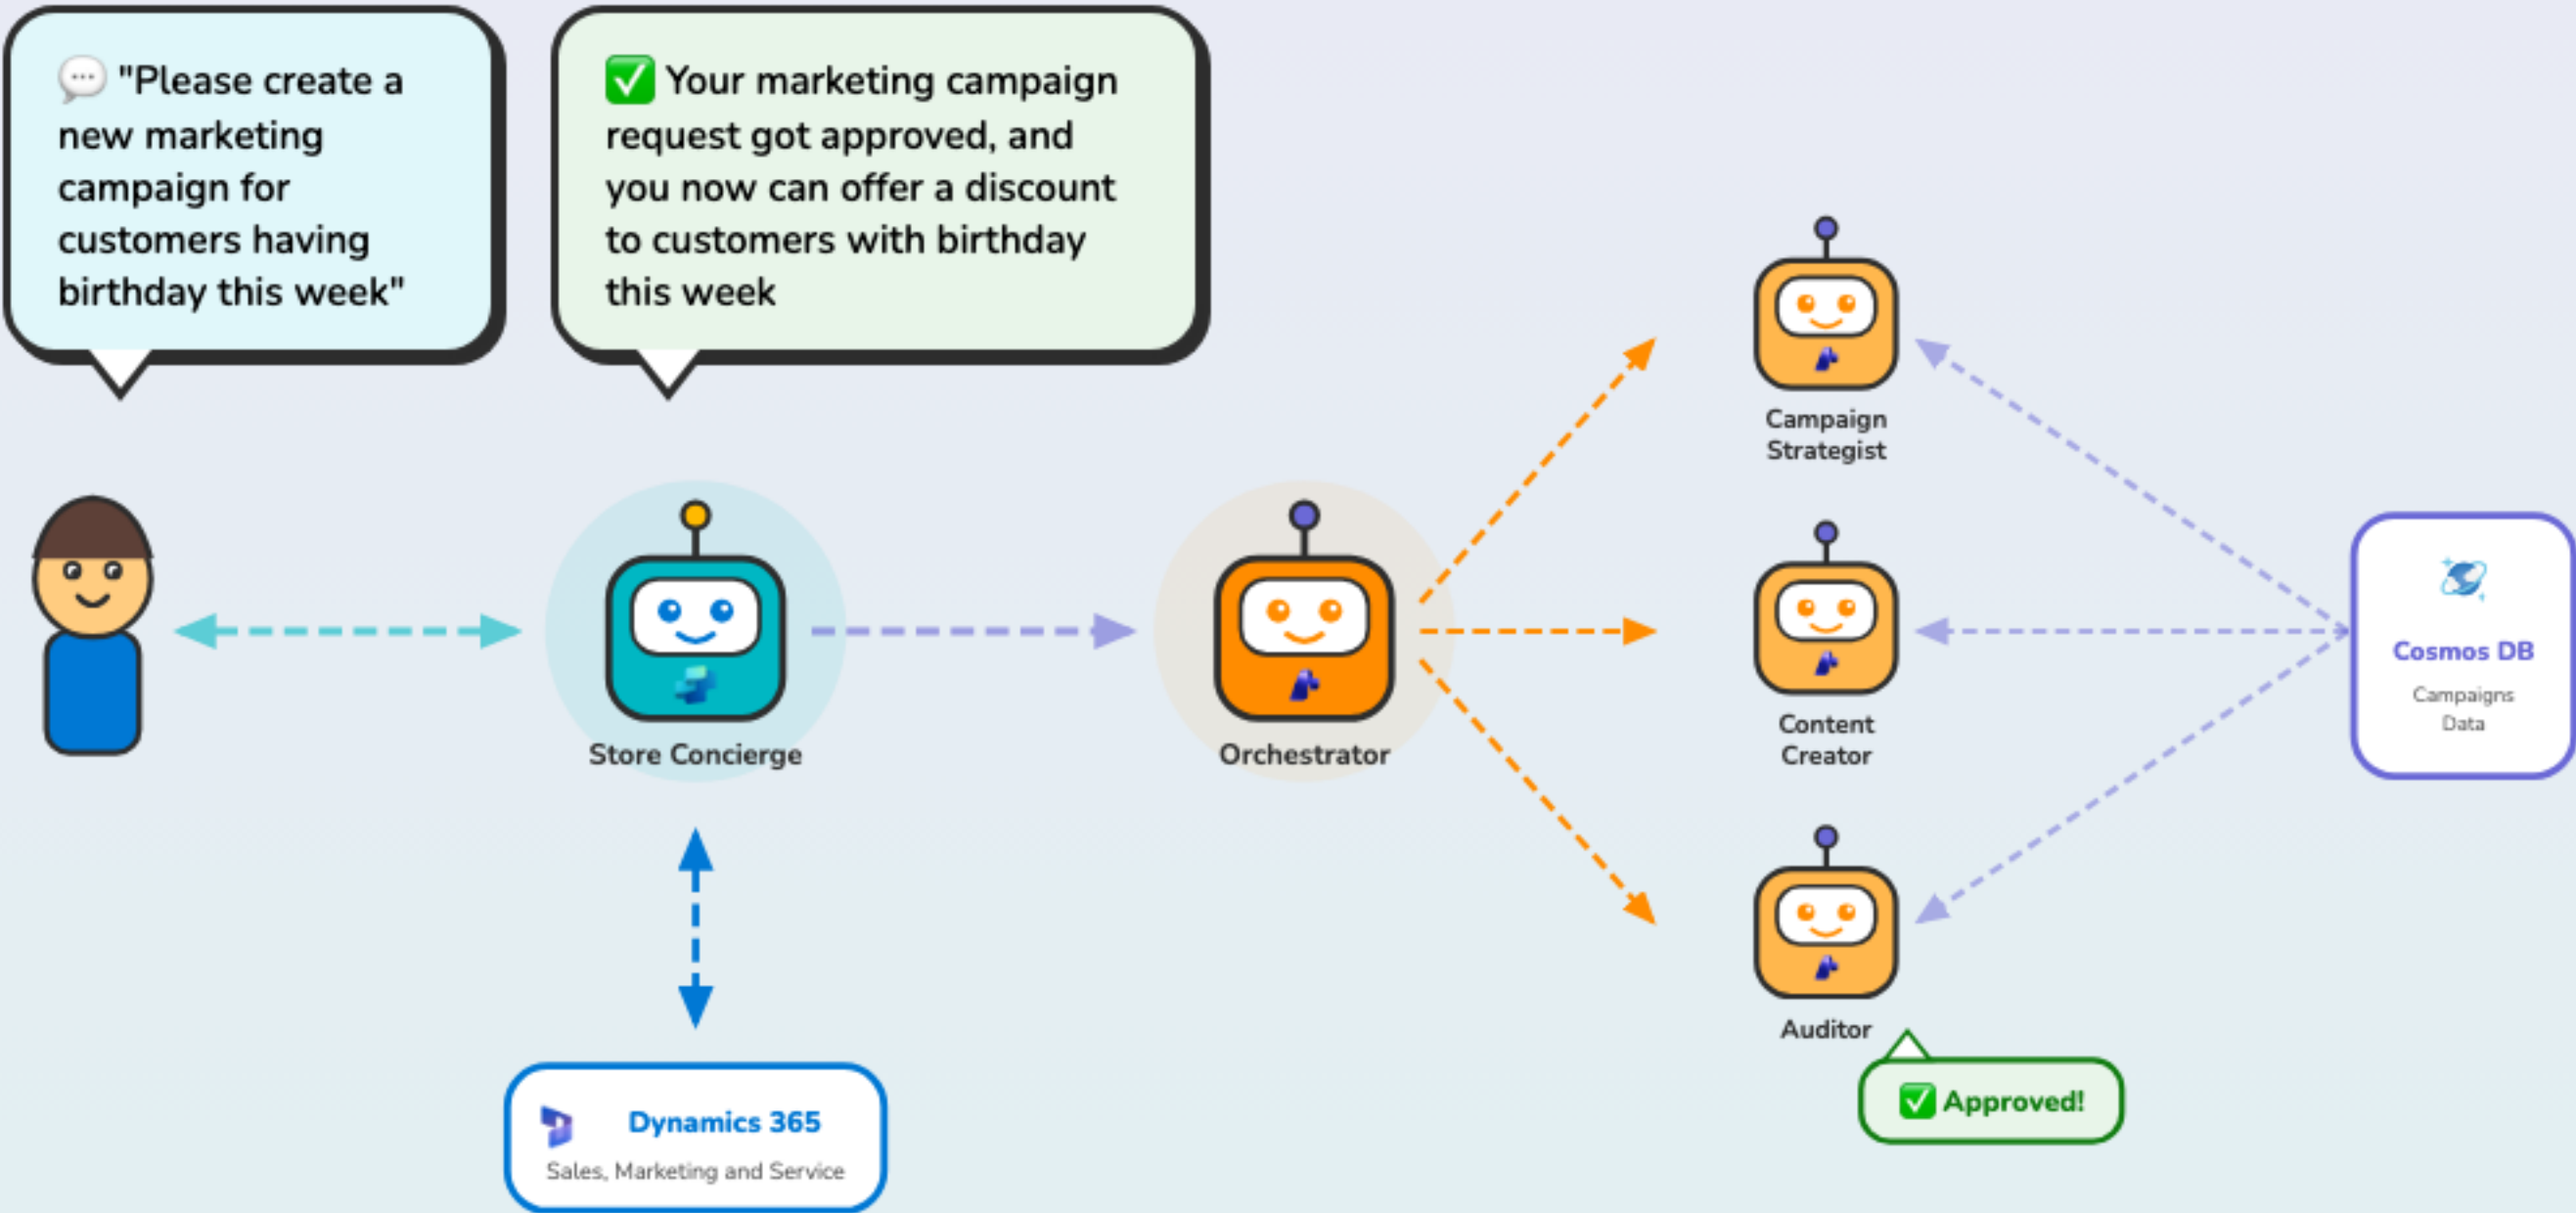

We Want More

In today's world, reading data is not enough anymore

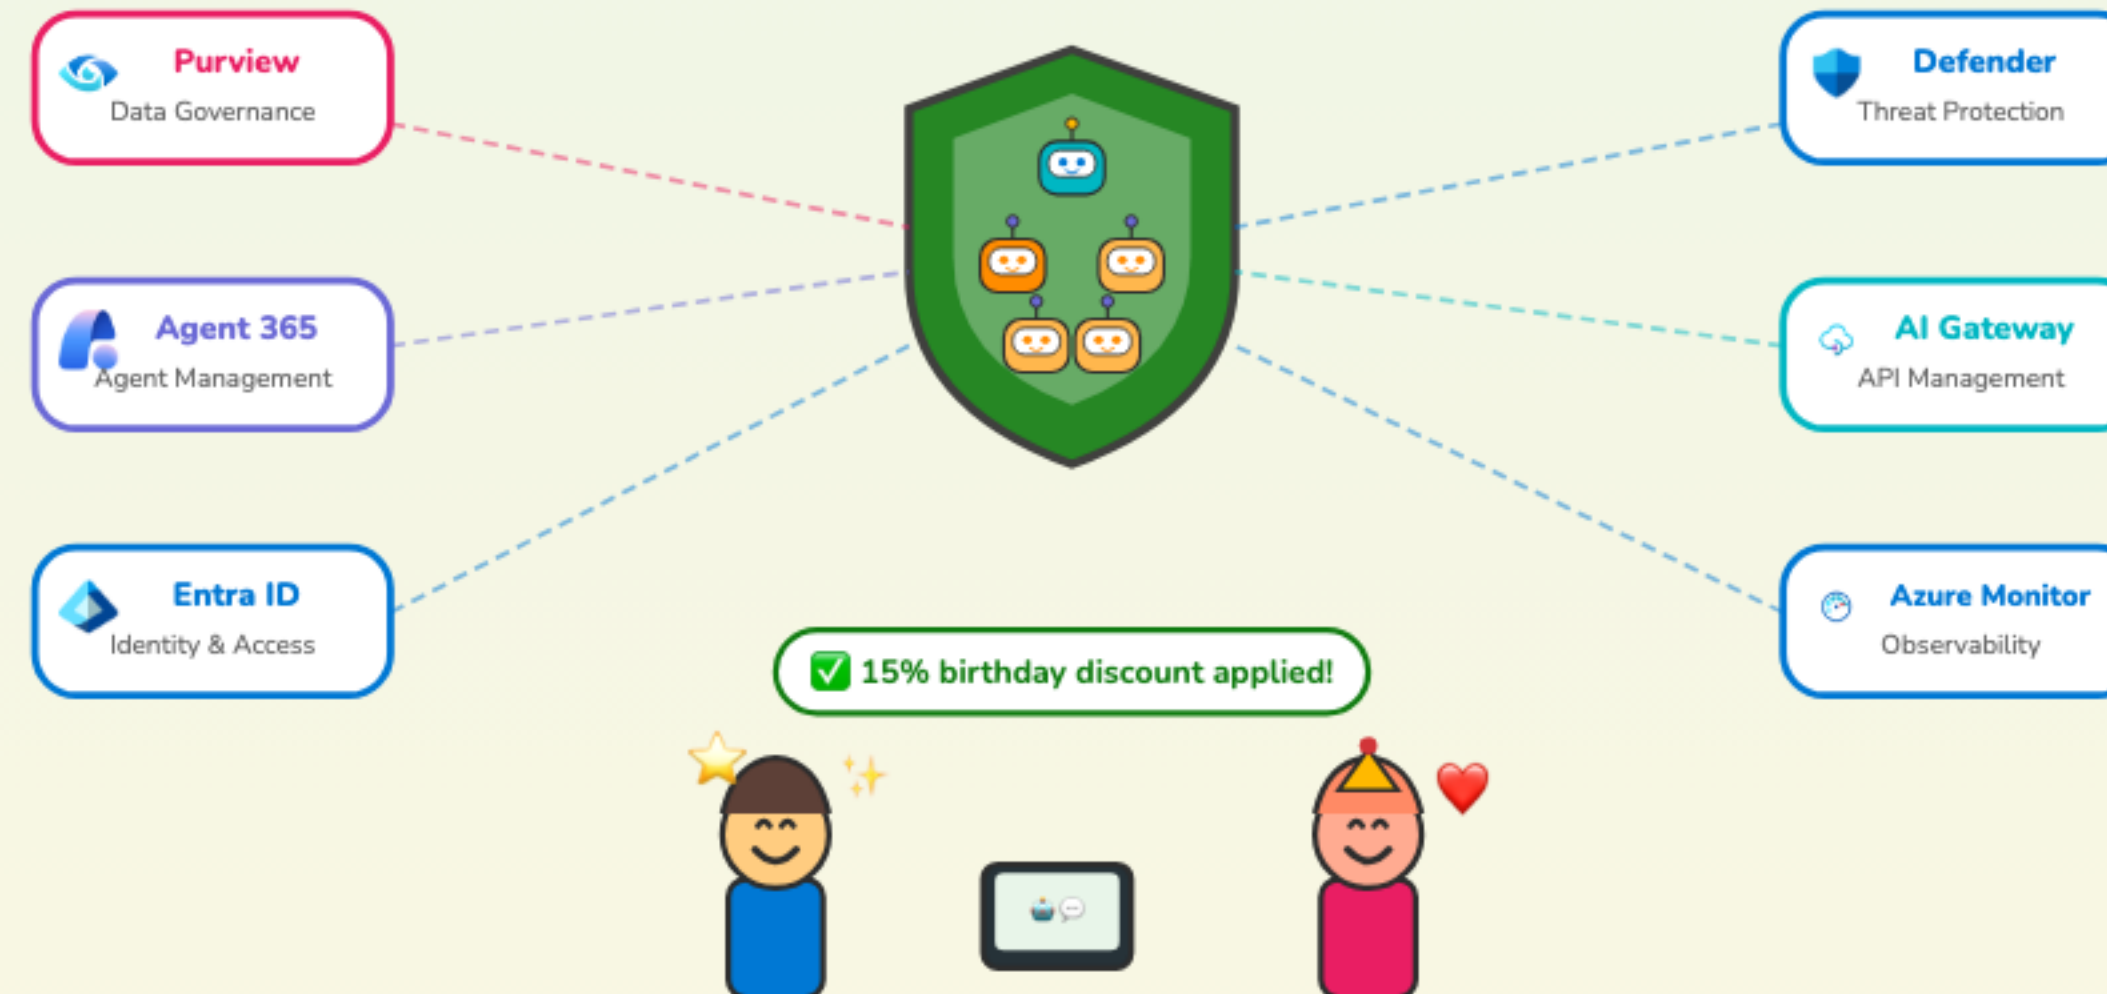

The Full Agent Platform

The store associate requests a campaign, the agent platform handles the rest

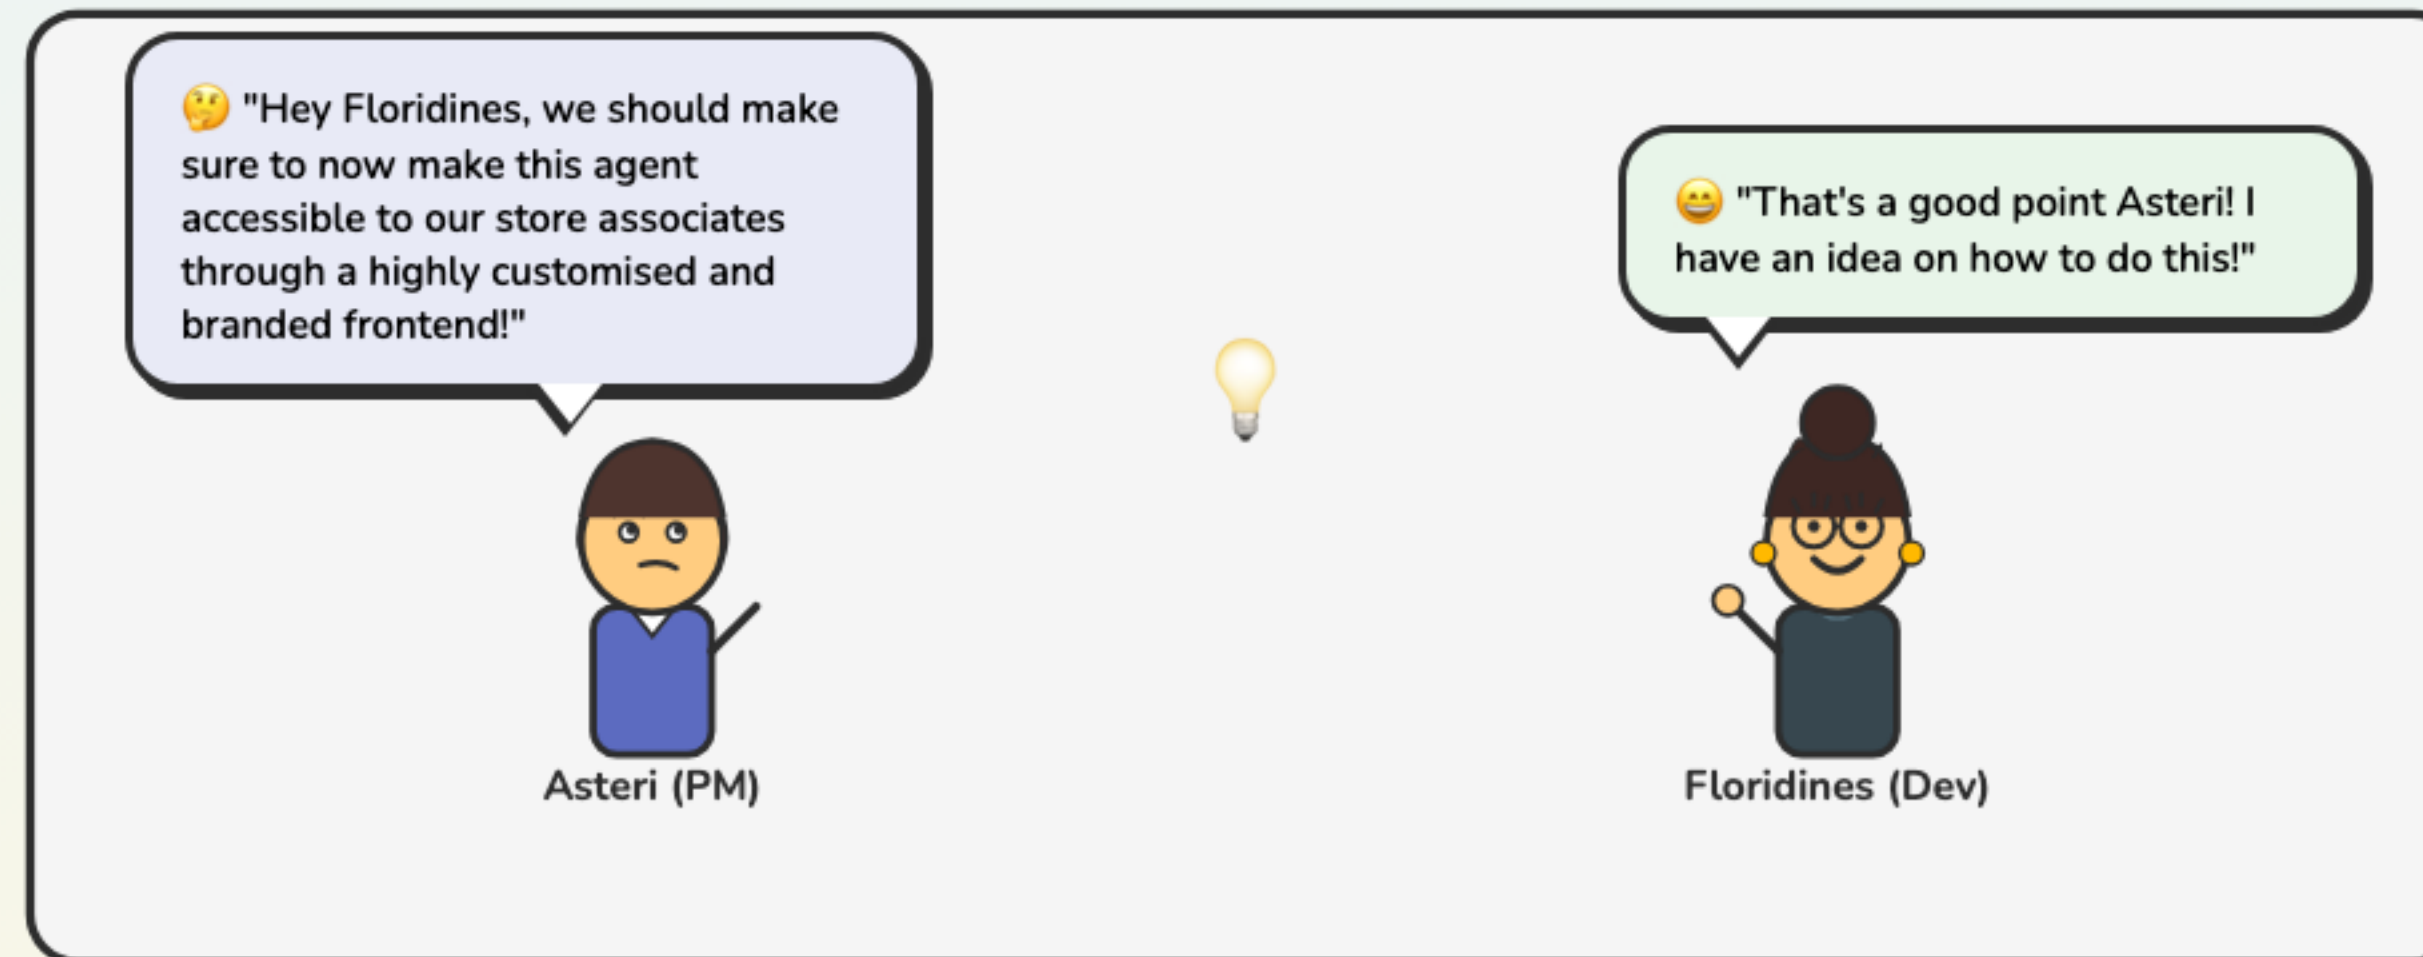

Secure, Governed & Happy

Everything monitored, everything compliant, everyone happy

Now, Let's Publish This

Building a custom branded web app usually takes weeks, but not this time

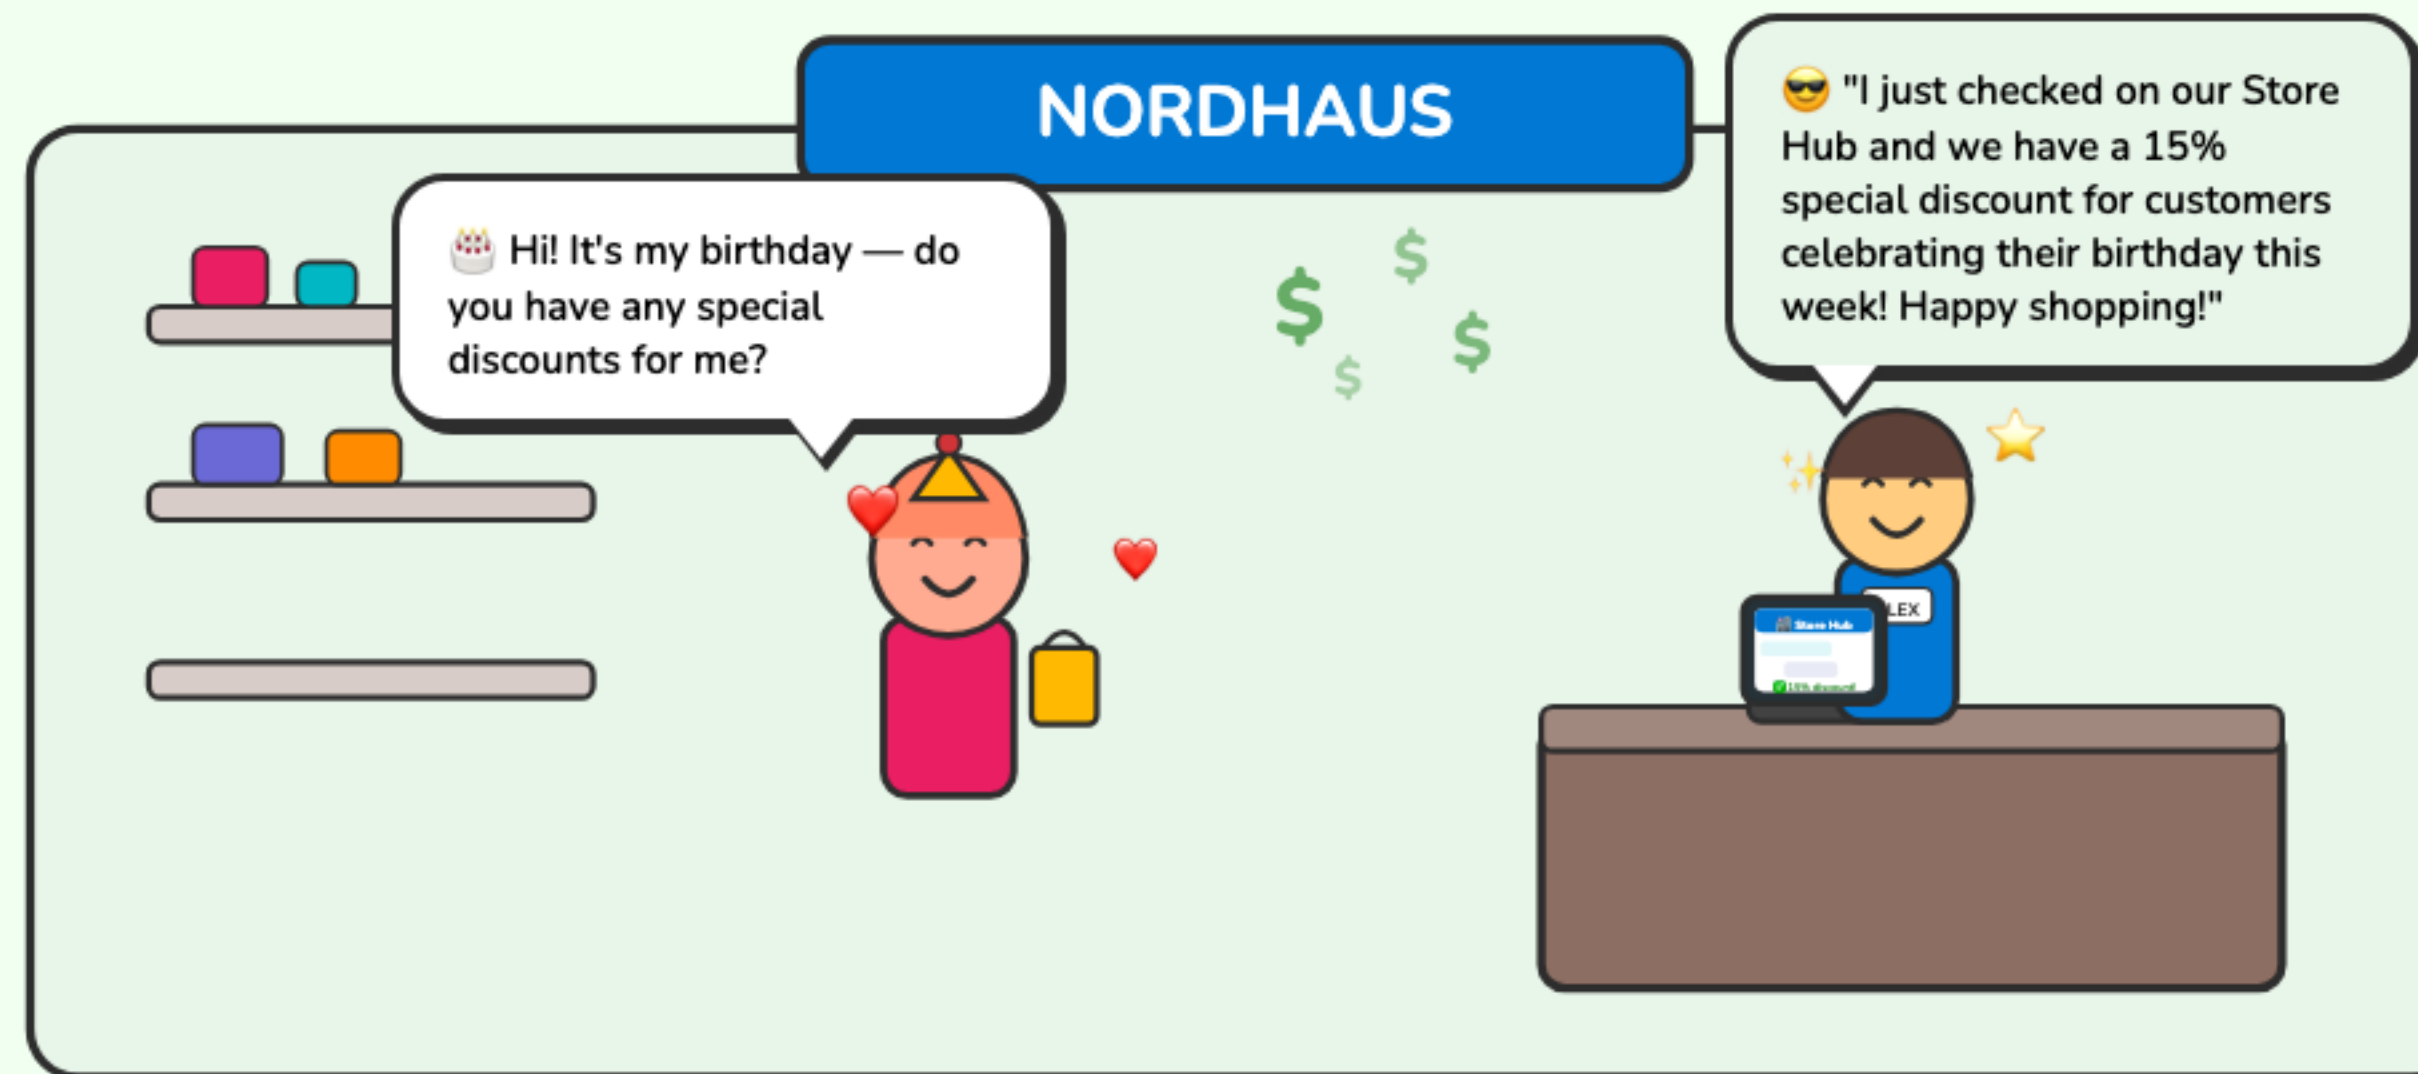

Building the Store Hub

With GitHub Copilot, a branded store app goes from idea to production in record time

The Solution

Same store, same question, completely different experience

One AI Platform. Not 50 Point Solutions.

Empowering every store associate with intelligent agents
